Precision Parts and Remanufacturing

"PPR is committed to consistently deliver high quality remanufactured products, on time, and accurately, through a team dedicated to continual improvement."

Hazard Recognition: Watch Out for Dangers

There are always multiple things requiring your attention. And, a lack of focus on the task at hand can lead to tragedy, especially in higher risk situations.
A leading cause of work-related death and injury is due to contact with objects such as:

- Being pinned between objects
- Struck by an object
- Caught in an object or equipment
- Caught in collapsing material

Paying attention to your surroundings and concentrating on the task at hand is vitally important in keeping you and your coworkers safe. All employees should conduct regular safety checks around their work stations to identify existing and potential hazards. Try taking a fresh look at your surroundings on a regular basis. Recognizing existing and potential hazards and developing safe habits will help you create a safer, more productive work environment.

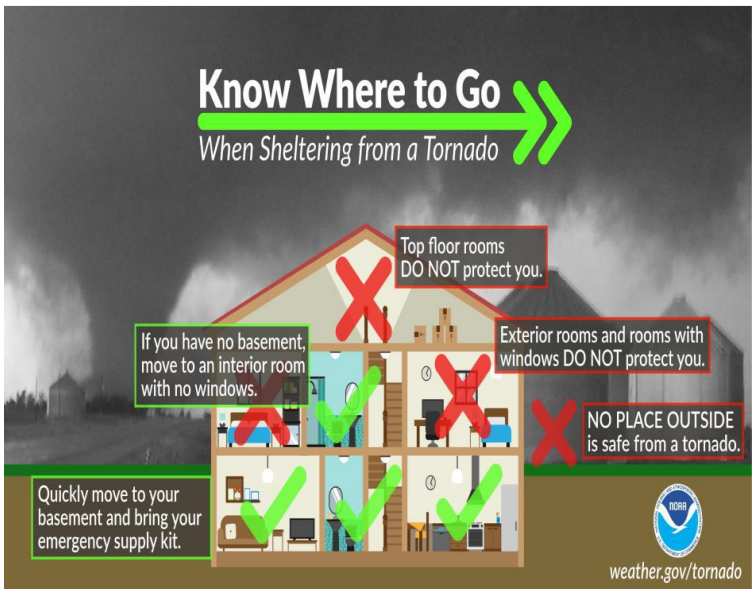

Hazard Recognition Checklist

- Check your workstation for exposed electrical cords and other tripping hazards
- Store heavy objects close to the floor and out of walkways
- Store tools, equipment and materials properly to prevent falling or sharp edges from being exposed
- Stack materials to prevent sliding, falling or collapsing
- Wear the required AND proper personal protective equipment for the task you are performing
- Use extra caution in high traffic areas, around corners and near doorways
- Take regular safety walks to identify existing and potential hazards
- Make sure cups and glasses have lids on them
- Avoid distracted walking
- Know the process for reporting hazards

By learning to identify existing and potential hazards, you are better equipped to create a safer environment for yourself and your coworkers.

Safety is everyone's responsibility

Tornado season is approaching so please prepare all of the proper amenities needed such as candles, snacks, flash lights, bottle water and a battery-operated weather radio. Ensure of a plan in place on where you will go if you are at home and a tornado happens.
