Precision Parts and Remanufacturing

"PPR is committed to consistently deliver high quality remanufactured products, on time, and accurately, through a team dedicated to continual improvement."

Manufacturers with quality control procedures in place are far less likely to face product recalls or place customers at risk from poorly made products. Our goal is always to keep quality control in focus, ask questions, work hard, and we will all reap the rewards.

Benefits of Using Quality Control

Customers expect and demand high-quality products. When customers receive quality products it will benefit the whole company in many ways:

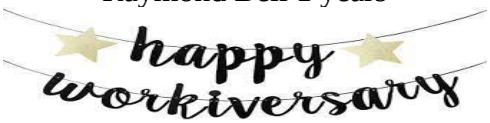

- Increase customer loyalty
- Gain repeat business
- Gain new customers from referrals
- Maintain or improve your position in the market
- Improve safety
- Higher Productivity
- Reduce liability risks
- Contribute to overall positive branding of your product
- Higher Profitability
- Elimination of waste and defects

MAKE SURE YOU CLOCK IN AND OUT DAILY. If there is a problem let your supervisor or HR know immediately.

Call in hotline
405-681-2592 Push 1

Do not call or text your supervisor or a coworker. You must call in prior to your shift and give a reason why you are calling, going to be late or any other issues. If you do not call the number as directed you will show as a no call no show.

March is National Safety Ladder Month
Basic rules for ladder safety

- Use the right ladder for the job. It is important to choose a ladder that has the proper load capacity for the job.
- Inspect the ladder before and after use.
- Set the ladder up correctly.
- Climb and descend the ladder with caution.
- Be safe and use common sense when using a ladder.
- Read and follow all labels/markings on the ladder.
- Avoid electrical hazards!
- Always maintain a 3-point (two hands and a foot, or two feet and a hand) contact on the ladder when climbing.
- Do not use on slippery surfaces unless secured or provided with slip-resistant feet to prevent accidental displacement.
