PPR News

November 2023

Precision Parts and Remanufacturing

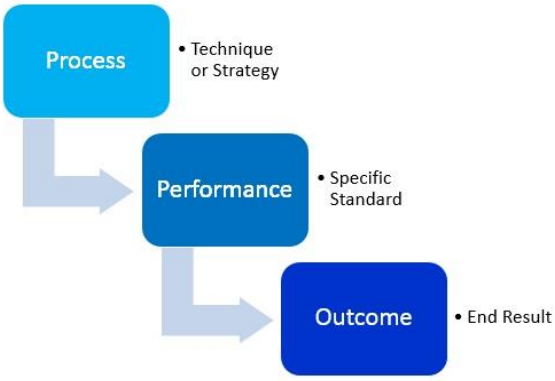

"PPR is committed to consistently deliver high quality remanufactured products, on time, and accurately, through a team dedicated to continual improvement."

PRODUCTION GOALS

There are three types of goals- Process, Performance, and Outcome goals.

Goal-Setting

- Process goals are specific actions or 'processes' of performing.
- Performance goals are based on personal standard.
- Outcome goals are based on winning.

5 Tips for Setting Manufacturing Goals and Objectives

1. Make the Goals Specific. Goals and objectives need to be specific.
2. Track and Measure Your Progress. On any given day you should know if your company is on track to reach its target.
3. Include Everyone.
4. Set Deadlines (and stick to them).
5. Create a Goal-Oriented Culture.

PPR will be closed on Thursday November 23rd in Observance of Thanksgiving; we will also be closed Friday November 24th. Please remember Friday November 24th is an unpaid day.

Influenza (flu) and COVID-19 are both contagious respiratory illnesses, but they are caused by different viruses.
Because some of the symptoms of flu, COVID-19, and other respiratory illnesses are similar, the difference between them cannot be made based on symptoms alone. People can be infected with both flu and the virus that causes COVID-19 at the same time and have symptoms of both influenza and COVID-19. If you have symptoms please stay home and consult with your physician.

Similarities:
Both COVID-19 and flu can have varying degrees of signs and symptoms, ranging from no symptoms (asymptomatic) to severe symptoms. Common symptoms that COVID-19 and flu share include:

- Fever or feeling feverish/having chills
- Change in or loss of taste or smell
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Sore throat
- Runny or stuffy nose
- Muscle pain or body aches
- Headache
- Vomiting and diarrhea
